Re

DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-52 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 12-21 of U.S. Patent No. 6,432,247. Although the conflicting claims are not identical, they are not patentably distinct from each other because the limitation "bonds to the mounting member" in the instant claims encompasses the limitations "using a bonding enhancer" and "using a bonding layer" as claimed in 6,432,247. A person practicing the invention taught by claims 19 or 20 of 6,432,247 would necessarily infringe the instant claims 1-37. Regarding claims 38-52, 6,432,247 does not teach using a vent tube. It is generally well known in the art to use a vent tube, and would have been to a person of ordinary skill in the art at the time of the invention to use generally well known hearing aid molding techniques to use a vent tube.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Daniels (US Patent 3,470,328); Woodfill, Jr. (US Patent 5,321,757); Arndt (US Patent 5,357,576); and Devoe et al. (US Patent 5,572,594) all teach hearing aids made with vent tubes.
